Experience

Slalom Build

Machine Learning Architect

Sydney, AU

May. 2022 – Present

- Architected and developed a scalable, reproducible model training pipeline on AzureML for a transportation client, addressing complex object detection challenges.
- Designed and deployed a serverless Generative AI solution on AWS for a legal client, significantly enhancing productivity in analyzing customer survey data.
- Delivered a comprehensive end-to-end MLOps solution for a manufacturing client using AWS SageMaker and GitHub Actions, leveraging Terraform for automated infrastructure provisioning.
- Refactored a segmentation model code using Ray and orchestrated pipeline through composer on GCP for a retail client, reducing the operation time by 3x.
- Led technical solution design, built prototype and deployed ML applications at scale.

Endeavour Group

Senior Data Scientist

Sydney, AU

Nov. 2020 – Feb 2022

- Operated and maintained a recommendation model for a major Australian liquor brand, generating personalized offer emails to millions of customers.
- Monitored and analyzed model and email campaign performance, providing recommendations for model optimization.
- Integrated experiment tracking into the existing ML pipeline, enabling rapid iteration and efficient model development for data scientists.

Elula

Data Scientist

Sydney, AU

Jun. 2018 – Nov 2020

- Developed a scalable data quality check tool using PySpark to handle billion-record datasets and detect data drift for continuous model training.
- Designed and customized predictive models for predicting customer churn on home loan application.
- Engineered an automated data pipelines (ETL) on AWS for enhancing data analysis workflows.

Professional Certifications

-
- | | |
|---|---|
| • AWS Certified Machine Learning - Specialty | • Google Cloud Professional Machine Learning Engineer |
| • Databricks Certified Generative AI Engineer Associate | • Google Cloud Professional Data Engineer |
| • Databricks Certified Machine Learning Professional | • Google Cloud Professional Cloud Developer |

Skills

Machine Learning, MLOps, GenAI, Python, AWS, GCP, Databricks, Azure, DevOps

Education

University of Technology Sydney, Computer Science

Doctor of Philosophy

Sydney, AU

Dec. 2017

- Thesis: Cross-domain Recommender Systems through Tag-based Models
