Experience

Commonwealth Bank of Australia
Senior Software Engineer

Sydney, AU
April. 2025 – Present

- Build and maintain AI agent capabilities with the GenAI platform, focusing on Dialogue Monitoring (DM), quality assurance and risk controls that allow the bank to scale AI adoption safely.
- Design technical solutions, write and test code, troubleshoot production issues, and work closely with product and risk teams to translate business requirements into working features.

Slalom Build
Machine Learning Architect

Sydney, AU
May. 2022 – April. 2025

- Designed and deployed a serverless GenAI solution with AWS Glue, Bedrock and OpenSearch for a legal client, significantly enhancing productivity in analyzing customer survey data.
- Engineered and deployed an full-stack GenAI app with streamlit as frontend and AWS Fargate as severless backend for an internal initiative, which is now widely adopted as demo tool for pre-sales activities.
- Architected and developed a serverless GenAI Proof of Concept (PoC) featuring a React-based frontend and a backend utilizing AWS services such as API Gateway, Lambda, Bedrock, and OpenSearch. The solution enables automated drafting of email bodies using knowledge from an internal database and is fully provisioned via AWS CloudFormation for seamless deployment.
- Delivered a comprehensive end-to-end MLOps solution for a manufacturing client using AWS SageMaker and GitHub Actions, leveraging Terraform for automated infrastructure provisioning.
- Refactored a segmentation model code using Ray and orchestrated pipeline through composer on GCP for a retail client, reducing the operation time by threefold.

Endeavour Group
Senior Data Scientist

Sydney, AU
Nov. 2020 – Feb 2022

- Operated and maintained a recommendation model for a major Australian liquor brand, generating personalized offer emails to millions of customers.
- Monitored and analyzed model and email campaign performance, providing recommendations for model optimization.
- Integrated experiment tracking into the existing ML pipeline, enabling rapid iteration and efficient model development for data scientists.

Professional Certifications

- Databricks Certified Generative AI Engineer Associate
- Databricks Certified Machine Learning Professional
- AWS Certified Machine Learning - Specialty
- Google Cloud Professional Machine Learning Engineer
- Google Cloud Professional Data Engineer
- Google Cloud Professional Cloud Developer
